Tips and Tricks for using Git

No code should be written without some sort of version control. Yet students often do not feel comfortable using it. This talk will attempt to alleviate that by covering the basics of Git and then covering some advanced tips and tricks for using Git.

The talk will be given by Cole Alves, who currently works at Boeing as a software developer and graduated from UMSL in Fall 2019. He was a President of the CS Computing Club and competed in many Hackathons and group projects.

Zoom talk: 3/19/2021

The talk will be held on Friday, March 19th from 4pm to 5pm.

https://umsystem.zoom.us/j/7220694685

This talk is open to all students of UMSL with interest in version control. The talk should be understandable for anyone with an introductory knowledge of programming.
