INFORMATION TECHNOLOGY SERVICES • UNIVERSITY OF MISSOURI - ST. LOUIS

December 2014

iPad Teaching Circle

UMSL has a growing number of faculty who are exploring how the iPad can support their research and teaching. We meet monthly to explore apps and ideas. Join us on Thursday, January 29, 2015. We will meet from 3:30-4:30, but if you want to come early with basic questions on setting up your iPad, please come at 3:00. We will be in the CTL conference room (589 Lucas Hall).

We will focus on how to use Explain Everything. This app has been described as one of the essential apps for the iPad. If you come this day, please make sure that you have downloaded the app before you come. This is a paid app (\$2.99), so, please make sure you really want to purchase it before buying. If you would like to see a short video created by Dr. Terry Thiel from Arts & Sciences, please go to <http://bit.ly/UMSLipad>

There is also an Android version of this app too and Android users are also welcome to come.

If you would like to register, please visit our website to register: <http://www.umsl.edu/services/ctl/faculty/ipadteachingcircle/index.html>

Come with your questions. We will explore and learn together.

If you are interested in joining us, please contact Michael Porterfield (porterfieldm@umsl.edu) to learn more about this event.

Ready to Start Your Own Web Site??

Are you interested in creating your very own web site? Or maybe just having a place where you could upload files so that other people could link to (and download) them using the WWW? UMSL faculty and staff have access to a server called 'Soulard'; single documents and files or a complete web site placed on this server can be linked and shared with anyone—and the process is probably easier than you think. If you would like more information about this please contact the [Faculty Resource Center](#) (x6704).
