2015 UMSL Graduate Research Fair

April 20, 2015

3-6 PM

MSC Century Rooms

Although this event is called the Graduate Research Fair, undergraduates are invited to submit an abstract and present a poster describing their undergraduate research. The posters from both graduate and undergraduate students will be arranged by academic discipline (chemistry, biology, criminology, etc).

As the primary author on a poster, you would be expected to stand in front of your poster from 3 to 5:30 and be prepared to describe your research project to students and faculty who attend the poster session. This is considered a formal, public presentation, which will look good on your resume and/or application for Graduate School.

The posters will be reviewed by teams of faculty judges, and there will be cash prizes of up to $300 for the top undergraduate posters at the meeting.

Application Deadline: Wednesday, April 1, 4:30 PM

To apply, you must submit a nomination form signed by your faculty research advisor and an abstract describing your project. The nomination form and more detailed instructions on presenting/preparing your poster can be found at http://www.umsl.edu/divisions/graduate/Important%20Dates/graduate-school-research-fair_2015.html.
