We are currently seeking volunteers for a new research study investigating the frequency and recognition of mind-wandering in children.

Who:
Any child age 8-12 with no history of neurological conditions or psychiatric diagnoses who is a native English speaker.

What to expect:
1. Your child will complete one computer task.
2. They will complete various written and oral tests.
3. They will participate in a semi-structured interview.

You will be compensated with a $20 Visa gift card for your time.

For more information or to participate contact:
Carissa Philippi at (314) 516-5357
