Graduate Certificate Policy

Applies to the Graduate Certificates in the Department of Computer Science. Joint certificates may have additional policies.

The certificate program requires:
1. Admission into the certificate program.
2. Courses to take to complete the certificate.
3. A request for the certificate to be awarded.

Admission into the Certificate Program

1. A current graduate student at UMSL (degree or non-degree seeking, from any department or program) must apply for admission into the specific certificate program and be accepted before the actual certificate award can be completed.
2. A current non-student must be eligible for graduate status (with a minimum bachelor degree) and apply for admission into the specific certificate program and be accepted before the actual certificate award can be completed, see this page for more information. These applicants can complete the certificate, or transfer to a degree program before or after completing the certificate with the courses transferable to the degree as long as applicable, or apply for a related degree program and the certificate.
3. An applicant for the certificate program must have a GPA of at least 3.0 for admission.
4. An applicant without computer science background/experience should contact the listed Certificate Coordinator to discuss feasibility of taking some of the core courses. Applicants must have the following courses, take them as prerequisites, have related background or experience, or have graduate standing in Computer Science or Cybersecurity:

   **Artificial Intelligence**
   - Math 1100 or 1800, 1320
   - Cmp Sci 2250, 2261, 3130

   **Cybersecurity** (Computer Science version)
   - Math 1320, 1100 or 1800
   - Cmp Sci 2250, 2750

   **Data Science**
   - Math 1320
   - Cmp Sci 1250

   **Internet and Web**
   - Cmp Sci 2261, 3010

   **Mobile Apps and Computing**
   - Cmp Sci 2261, 3702/5702

Additional areas/courses may be needed depending on specific chosen electives.
Courses in the Certificate Program

1. Required (core) courses for the certificate passed within the preceding three years prior to completing the certificate are automatically approved for the certificate. Electives, course substitutions, and older courses must be approved by the Certificate Coordinator who will pass this to the Graduate Director.
2. The same course can be used to satisfy a degree program and any number of certificates.

Certificate Award

1. Certificates are awarded using the same mechanism as degrees. The student will need to apply for award of certificate during the last semester in which the student is expected to complete the requirements for the certificate. This is done electronically through the Graduate School (M4 form).
2. Certificates are governed by the same rules as graduate degrees – at the time of award the GPA of courses in the certificate, and the overall GPA must be at least 3.0.
3. When awarded, the student will have the certificate added to their transcript and may request a printed certificate from the Certificate Coordinator.
4. The certificate can be earned the same time as another graduate degree or separately. Anyone using the certificate as part of their program (a certificate option) will need to apply for the certificate prior or at the same time as applying for the actual degree – otherwise the certificate option cannot be used.

Certificate Coordinators

Certificate Coordinators for each certificate are listed on the certificate web pages. Any changes in the requirements must be approved by the Certificate Coordinator.
