“Helping others” is a common response to the previous question. How will healthcare help you do that?

Early Admission and Reserved Admissions Programs

UMSL is proud to offer programs that allow students either an accelerated path to professional school or the opportunity to be accepted early in their pre-health studies. Each program is unique, and requires that students begin at UMSL before attaining 26 credit hours. Due to the fast-paced nature of each, students need to prepare for them during their freshman year. We are actively pursuing additional partnerships to be able to offer students a wide range of opportunities with healthcare.

Alternative Plan

All UMSL Pre-Health students are encouraged to identify a parallel plan for success in addition to planning for their chosen pre-health track. Entrance into professional healthcare schools is highly competitive and requires excellence in GPA and test scores in addition to community engagement and a display of commitment to healthcare. **Less than fifty percent of applicants nationwide are admitted to these schools.** Alternative plans are vital in the event that a student's interests and career plans change or a student is unable to gain admission to a particular professional healthcare program.

Questions to Consider When Choosing a Parallel Major

1. What were your favorite subject areas in high school? _____

2. In which courses have you earned the highest grades? _____

3. What do you do well (ie: organization, communication, physical activity, creativity, etc.)? _____

4. What subject areas or skills are normally a struggle for you? _____

5. Who is one person you admire? Why? What does he/she do? _____

Majors/Programs to Consider

1. What is your preferred work environment upon graduation? _____

2. What classes would you prefer not to have to take (ie: writing, lab science, math, etc.)? _____

3. What other majors/careers have you pictured yourself doing or considered in the past? _____

4. Majors to explore for a parallel plan: _____
