

# CURRENT

UNIVERSITY OF MISSOURI / SAINT LOUIS

## UMSL receives \$170,000 optometry grant

Earl Swift

A regional Optometry School at UMSL may begin admitting students as early as September, 1980, according to Chancellor Arnold B. Grobman.

A \$170,000 grant was secured last week for the school's start-up operations from the U.S. Department of Health, Education and Welfare.

If additional funds are obtained from the Missouri Legislature, UMSL's institution will become the fourteenth optometry school in the nation, and will admit 40 students per year.

Grobman said that the university must meet requirements imposed by the legislature before the school can be established. "I've been workin on this ever since I've been here," he said. "It's been one hurdle after another, and we've been jumping over each one. We have a number of things to do yet."

"We need to get further

approvals from the University of Missouri's Board of Curators and the (state) General Assembly, because we haven't met quite all of the requirements of the general Assembly's House Bill 1691," he said.

House Bill 1691 was one of two bills concerning the school passed by legislators in early 1978. The house bill, introduced by Representative Jay Russell, and Senate Bill 874, introduced by Senator Harriett Woods, contained similar wording.

The bills require three things of the school before the state will hand over funds for its establishment. One, the school must be structured in such a way that it can receive accreditation in the future.

Two, the school must receive federal funds, a requirement met by HEW's grant.

Three, the school must be regional in nature, serving states other than Missouri. Optometry schools currently in operation

reserve a fixed number of seats for in-state students, and sell seats to other states.

"The contractual arrangement with other states has not yet been accomplished," Grobman said. "The other states aren't really anxious to sign a contract until a school is already operating."

"You wouldn't walk into a store and say, 'I'll take a bar of soap when you get it,'" he said.

Grobman said UMSL's school will reserve 30 seats for Missouri students and will make 10 available to other states.

He also said that work is underway to ready the campus for the new school despite the

problems in attracting states to the program.

"We have a search committee looking for a dean, and the applications (for that position) are due Oct. 31," he said. "And we have application packets prepared for students who are interested in applying."

[See "Optometry," page 3]

## Colby, Stilwell debate SALT II

Charmagne Schnelder

William Colby, a former director of the CIA, and General Richard Stilwell, a retired Army general, debated "The Pros and Cons of SALT II on September 27 in UMSL's J.C. Penney Auditorium.

The debate was sponsored by the St. Louis Council on World Affairs in cooperation with the Foreign Policy Association.

Colby spoke first in defense of SALT II ratification. "We are better off with it than without. It doesn't eliminate nuclear weapons from the world, but it helps us to better handle the fundamental hostility of the Soviet Union," he said.

Colby then outlined the specific provisions of SALT II, saying that the Soviet Union currently has 2,500 missile launchers and that without the SALT II treaty, this number would eventually increase to 3,000.

Under SALT II\* launchers would first be limited to 2,400, then to 2,250. In addition, SALT II would place a limit on the number of warheads allowed on each weapon.

"The Soviet Union's current SS18" said Colby, "can have up to 40 individual warheads, each with many times the throw-weight of the bombs used in Hiroshima and Nagasaki during WW II."

SALT II would limit to ten the number of warheads allowed, which, Colby stated, means 6,000 less warheads.

Colby said that another advantage of the treaty is the limitations that will be placed on new missile development. He stated that the Soviet Union currently

builds four new missiles per generation, while the U.S. builds only two new missiles per generation.

The SALT II treaty states that henceforth, both sides may build only one new missile per generation.

Colby said that concern about weapons limitation was not new, but that government initiatives were new.

"As early as 1946," stated Colby, "Bernard Baruch suggested that we give up our monopoly on nuclear weapons and that all nations should commit themselves to weapons limitation."

can't expect to get everything. We both have advantages and neither of us get everything we want."

One of the factors Colby listed as an advantage to the Soviet Union was the exclusion of the Backfire Bomber as a strategic nuclear weapon. It is classified, instead, as a weapon for theatre purposes and is limited to use in Europe and naval force battle. However, Colby states, "It could conceivably be used against the United States."

In return for excluding the Backfire Bomber as a strategic nuclear weapon, Colby said the

**'If they (Soviet troops in Cuba) invaded the U.S. they'd get lost in the Miami traffic'**

Colby said, however, that this would not have been appropriate then because the U.S. couldn't trust Stalin and because American intelligence systems were inadequate to verify whether the Soviet Union was actually abiding by treaty provisions.

However, current American intelligence systems, asserted Colby, have progressed to the point that we can accurately verify the size of the USSR's nuclear arsenal.

Although the U.S. has lost the Iranian bases due to the Revolution in Iran, Colby contended that America will replace those, just as the U.S. previously found a replacement for Turkish bases when it lost those.

"Is this," asked Colby, "the best possible treaty? No. But we

United States got an acceptance by the Soviets that SALT II would allow us to build and deploy the Cruise Missile, a remarkably sophisticated weapon which can fly thousands of miles at such low altitude that it is virtually undetectable to the Soviets. "The Soviet Union currently has nothing comparable to this superior technology," said Colby.

Colby said that since nuclear warfare was virtually unthinkable to both the United States and the USSR, the real level of contest was in conventional warfare. "The best weapon the Russians have" he said, "is the unarmed transport aircraft."

Colby contended that another important threat of the Soviet

[See "Debate," page 2]

## Student directories to be published late

UMSL's 1979-80 student telephone directory will be available free to students when it is published in January, according to Julia K. Muller, dean of Student Affairs.

The directory, which has not been published since the Fall, 1977 semester, will be printed by a commercial printing house.

In recent years, the directory was produced on campus and cost 25 cents per copy.

The booklet was not printed last year because, according to then-dean of Student Affairs Conney Kimbo, the cost per directory did not defray the \$800 to \$1,000 cost of publication.

About 9,800 1977-78 directories were printed at a cost of \$1,138.29, and just over 714 were sold.

This year's directory will be the first since 1973 to be produced by an outside printing company.

A St. Louis firm, the Ron Gross Publications Co., will print directories for UMSL. St. Louis

University and Washington University and will provide UMSL with 11,000 free copies of the booklet. Printing costs will be funded through advertising in the directory.

Muller said that the late publication date for the directory stemmed from the company's difficulty in securing advertisements.

"Last year, we were contacted by two different commercial outfits who wanted to know whether we'd be interested," said Muller. "We said that we would be."

"We chose the company that had produced directories before," she said. "The guy also contracted at about the same time with St. Louis U. and Washington U."

"He started selling advertisements, and could sell to merchants around St. Louis U. and Washington U., but had trouble selling to merchants around UMSL," she said. "Apparently

[See "Directories," page 3]

## Five win Central Council seats

Jim Wallace

Eight students ran for five representative seats and 48 freshmen and transfer students out of a possible 2,500 voted in central Council's new student elections last Wednesday and Thursday.

Janine Curtis received the highest number of votes with 28. She was followed by Linda Wirt, with 21 and Michael Johnson, with 19. Sue Derochie and Michael Mack each received 18 votes.

Clifford Reeves, Ranley Killian Jr., Tim White and three writ-in candidates — Tony O'Driscoll, Kenneth Racer and Mark Harder — did not receive enough votes to be elected.

"Usually there aren't enough

candidates but lots of votes," said Mark Knollman, student body president. "This year, the opposite has occurred."

Knollman said he was "impressed with the eight candidates" and that the "voter turnout was about average for UMSL."

Knollman attributed most voter apathy to the extinction of the Student Action and Involvement League (SAIL), a council political party that boasted some strength until 1977.

"In the past SAIL would objectively interview and based on those interviews would endorse enough candidates to fill the ballot," he said.

"If SAIL still existed, the turnout might have been raised to 200 voters."

Knollman said he had a "strange feeling that students who ran didn't bother to campaign because they weren't aware of any competition" and because they "weren't aware of the accessibility of campaign materials."

Yates Sanders, student body vice president, said that he too was "impressed by the qualifications of the eight candidates."

Sanders also said that the turnout was average and that he "was not upset by the turnout."

"Most people," he said, "were not very interested."

Julia K. Muller, dean of Student Affairs, described the turnout as "too bad."

"Maybe Central Council will take into consideration the voter [See "Elected," page 3]

## what's inside

### Catching a buzz

Five professors in UMSL's biology department have formed the Bee Research Group to study aspects in the lives of all-too-familiar hymenopterans. . . . page 6

### Unusual athlete

Mark Kickham, an UMSL junior, has participated in organized basketball and track events for several years—in a wheelchair. . . . page 7

### A tie, but a victory

The Rivermen kickers gave the tough, NCAA Division I SIU-Edwardsville Cougars a nasty surprise last week. They came very close to giving them an even nastier surprise. . . . page 9

## newsbriefs

### 'Who's Who' forms here

Nomination blanks are now available for UMSL students who wish to be considered for inclusion in "Who's Who Among Students in American Universities and Colleges."

Nominees must be juniors, seniors, or graduate students with 2.5 minimum GPA. Other criteria include participation in academic activities, participation and leadership in extracurricular activities, and citizenship and service to UMSL and/or to the community.

Nomination forms are available at the information Desk in the University Center; from the Office of Student Activities, 262 University Center; or from the Student Affairs Office, 301 Woods Hall.

Completed nominations must be submitted in 301 Woods Hall no later than noon, Tuesday, Oct. 9.

### Assertive training here

Assertive training, part of UMSL Continuing Education Discovery Program, is designed to teach participants to express themselves in a direct, honest way without alienating others. Goals for the course are to create more effective communication, higher self-esteem, and better relationships.

The course will be offered at the following times:

**Mondays, Oct. 8-Nov. 5, 1-3 pm at UMSL;**

**Tuesdays, Oct. 16-Nov. 20, 5-7 pm at UMSL;**

**and Wednesdays, Oct. 17-Nov. 21, 9:30 am-noon, at UMSL.**

Fee for the course is \$43. For more information or to register, contact Dave Klostermann at 453-5961

### Two programs established

The Committee on Institutional Cooperation has established two fellowship programs designed to increase the representation of members of minority groups among those who hold doctorates in the social sciences and the humanities.

The program will be funded by grants from the Lilly Endowment Inc. and the Andrew W. Mellon Foundation, totalling more than \$1 million. It will provide 25 two-year fellowships in the social sciences and 10 in the humanities for the 1980-81 academic year.

The fellowships provide full tuition plus a stipend of \$4,250 for each of two academic years. All students who have or will receive a bachelors degree by September, 1980 are eligible to apply for the 1980 competition. Application deadline is Jan. 15, 1980.

### Business School sponsors information service

The School of Business Administration, in conjunction with the School's Alumni Association, will continue to sponsor an on-going program called BASCIS - Business Alumni-Student Career Information Service.

The program involves approximately 80 business alumni who have volunteered to meet with business administration students, on a one-to-one basis, to provide them with some practical information about what is involved in various career paths.

It is available to business majors through the School of Business Administration's office of Academic Advising, 487 SSB.

## Debate

from page 1

Union was that to our allies. "The turmoil and hostility in the underdeveloped areas of the world could be easily exploited by the Soviet growth of power," he said.

He said that the billion dollar cut to the foreign aid budget at this time was a grievous mistake, and that rather than increasing our nuclear arsenal, the U.S. should increase their foreign assistance budget so that the underdeveloped areas of the world will not feel compelled to

turn to the Soviet Union for assistance.

Colby then spoke about the Soviet brigade in Cuba, a factor which has deterred SALT II consideration in the Senate. The Soviets contend that the 2,500 person brigade is merely for training purposes, and has been stationed on the island for 17 years with the knowledge of the United States. But the United States contends it is a newly-discovered combat brigade and sees it as a provocation from the USSR.

Colby discounted the significance of the Soviet brigade and stated that it shouldn't be a consideration in ratification of SALT II. He said "If they invaded the U.S. they'd get lost in the Miami traffic. Sure it's a problem, but let's look at it as an intelligence triumph that we've identified such a small number of people.

Colby's final comment was, "SALT II is a limited useful step in the right direction that will allow us to go on to further

# SKI ASPEN

## \$159

## JAN. 7-12

Roundtrip charter bus:  
only \$70 additional

The four mountain Aspen skiing complex is without a doubt the largest skiing facility in North America. There are 4 separate mountains—Aspen, Snowmass, Aspen Highlands, and Buttermilk and all are interconnected by free shuttle bus. With 33 ski lifts and over 300 miles of trails, Aspen has plenty of ski terrain to match any skier's ability. And when the lifts close and sun sinks, Aspen life is just beginning.

- **6 DAYS/5 NIGHTS IN A LUXURIOUS CONDOMINIUM** at the base of Snowmass lift No. 6. All condominium units are kitchen equipped, fully furnished and offer use of a heated pool, sauna, whirlpool, and laundry facilities. Free shuttle is also available to adjoining ski areas and to Snowmass Village.
- **3 DAY LIFT PASS AT ASPEN HIGHLANDS** is included with additional days available at a discount. Aspen Highlands, just 15 minutes from your condo, offers the highest vertical rise in Colorado.
- **SNOWMASS OPTION** — For those wanting "Ski to Your Door" convenience, a three mountain Aspen Ski Corporation pass good at Snowmass, Aspen Mountain and Buttermilk is available.
- **DISCOUNTED SKI RENTAL** is available for \$7.00/day (regular \$9.00/day)
- **FREE SKI PARTY AND SKI RACES**
- **FREE MOUNTAIN PICNIC**
- **TRANSPORTATION** — We will assist in arranging car pools for those interested in driving. Low cost motorcoach transportation and airfare is available from a nearby departure point.

# Enrollment increases to 11,053

Enrollment has risen to 11,053 this semester at UMSL, topping last year's figure by 165 students and early administrative enrollment projections for 1979-80 by about 500, according to chancellor Arnold B. Grobman.

Grobman mentioned the figures at a staff assembly held Tuesday in the J. C. Penney Building. The bulk of the increase, Grobman said, was in part-time students, although the number of full-time students rose by about 50 this semester.

"I expected it to go up," the chancellor said Oct. 3. "We worked hard on various recruiting programs. "We've been doing some advertising. I don't think that's a big contribution, but it lets people know that we're here."

"I've been looking at the figures from other years," he said, "and it seems that the numbers have gone up and down from year to year, and have fluctuated. I suppose we're going to experience some ups and downs during the next few years, until something substantial happens, like new programs."

Last year, enrollment fell to 10,888 from 11,374 in Fall, 1977.

In 1976, 11,188 students attended UMSL, and in 1975, 11,842. Admissions officials had predicted early in the year that enrollment would suffer a two percent decline. During the summer, they modified their predictions and forecasted a two percent increase, estimating that between 10,950 and 11,000 students would enroll.

Officials told the Current early

last month that the increase could be attributed to the state of the U.S. economy. During a recession, officials said, workers often lose their jobs or prospective workers cannot find employment, allowing them to return to school.

H.E. Mueller, director of Admissions, said that the enrollment increase is nationwide but that it is not a permanent trend.

## Elected

from page 1

turnout when setting up publicity for elections in the spring," she said.

The council conducts the new student elections — in which only freshmen and transfer students may run for office and vote — in the early fall, and conducts its general elections for all students in the late spring.

"Incoming students' highest priority is to get their feet on the

ground academically," said Rick Blanton, director of Student Activities. "They don't know what kind of commitment they're willing to give of themselves to student government. Plus, a lot of people work."

Blanton said he didn't notice much campaigning taking place during or before the elections.

Last year, five students vied for five representative positions on the council during new student elections.

## Directories

from page 1

the merchants don't perceive an UMSL student identity.

"He wanted to know whether we wanted to drop the contract," she said. "I don't like it (the late publication date), obviously, but it seemed to me it was better to have one late than to not have one at all."

Prior to 1973, UMSL used a

combined faculty-student directory sponsored by outside advertisers. After that, the university sponsored the publication of only a faculty-staff directory. Kimbo initiated the printing of a student directory with student activities monies.

The booklet contains the addresses, telephone numbers, student numbers and academic units of students.

## Optometry

from page 1

Applicants should take the OCAT (optometry aptitude test) by January 1980, and should apply for admission to the school by February.

The school will be housed in existing facilities on the Marillac campus, Grobman said. Some two-thirds of the Education Of-

fice Building has been left vacant in anticipation of the school's formation.

The federal government appropriated funds for the establishment of a regional optometry school in the area in November, 1978. The university's proposal for use of the funds at the UMSL campus was submitted the same month.

# newsbriefs

## Garden club planned

The establishment of a student garden club here—the first of its kind in the nation—is the goal of several faculty members, students, and area garden club officials.

The club's formation would represent the first time a collegiate garden club has been recognized by the National Council of State Garden Clubs in the U.S.

As members, students might be eligible to apply for scholarships and would be exposed to horticulture, conservation and landscape design techniques.

For membership information, call Charles Granger at 453-5811 or Kaye Pelech at 453-5777.

## 'Living Alone' offered

A course entitled "Living Alone" will be offered at UMSL from Oct. 10 thru Nov. 7, 7:30-9:30p.m., in J.C. Penney. The course will explore single lifestyles; whether single, divorced, or widowed.

The course is designed to review subjects like: enjoying independent lifestyles, learning skills necessary to living alone, coping with problems, and building support groups.

For more information, call Peggy at 453-5961.

## Free beer for blood

Beta Alpha Psi is sponsoring a Blood Drive to be held on October 15 and 16, from 9:15am - 2:15pm in 126 J.C. Penney.

Every student organization on campus has been urged to get at least 50 per cent of their membership, and all of their friends to donate. The organization to get the most people to sign up and at least 50 percent of their membership will win a free keg of beer.

A sign-up list can be found through Professor Dave Ganz, 453-5411 or room 1202 of SSB Tower. The goal set for UMSL this year is 300 pin's.

## Dressing tips given here

Pi Sigma Epsilon is sponsoring two guest speakers who will talk about "Dressing for Your Interview," to be given October 11, from 12:00-1:00pm in 126 J.C. Penney.

Tips for women will be given by Marilyn Phoenix, manager in Executive Training and Development for Famous Barr & Co. Richard Palank, UMSL business school faculty member, will offer tips for men.

## Video-production offered

A "hands-on" workshop designed to provide practical and applied experience in video production will be offered at UMSL, Monday nights from 6:30-9:30pm, October 15 through December 17.

The course has been developed for beginners who wish to develop TV production awareness and skills, as well as for the professional, who wished to improve his present skills.

All aspects of video-tape production will be covered in the course. The fee for the course, including the use of equipment and materials, is \$125. For information contact Joe Williams of UMSL Continuing Education at 453-5961.

## Landscape design course to be held here

A fourth program in the University's "Landscape Design" course will be offered at UMSL Oct. 9 and 10. The program, developed for gardeners, commercial and community planners and nursery personnel, is sponsored by the University of Missouri continuing Education-Extension, the Missouri Botanical Garden, the Frderated Garden Clubs of Missouri, and the National Council of State Clubs Inc.

Topics to be covered include evaluation of domestic design the use of herbaceous material in the lanfscap, contemporat, landscape design, subdivision and land development, planning and zoning, and the preservation of historic sites and structures.

Students who wish to obtain credit from the National Council of State Garden Clubs Inc. may take an optional written examination on Oct. 11.

Classes will meet Oct. 9 and 10 from 8:30 am-4:30 pm in the J.C. Penny Building. Fee for the complete course, including the written examination, is \$25. Registration fee for one day is \$5. For more information, contact Deborah Factory at 453-5961.

PRESTIGE

## New school will bring prestige

UMSL is growing up. Not long ago seen as just an arm of the University of Missouri-Columbia, UMSL is now becoming an independent, full-fledged partner in the UM system.

UMSL's most recent step towards maturity is the establishment of a regional optometry school here. As the first professional school on the UMSL campus, its establishment in 1980 will mark an important step for UMSL's recognition here and around the country.

Programs of these nature are what many schools are associated with. Around the UM system, Rolla has the engineering school, Kansas City has a medical program and a law school, and Columbia has many professional schools (including Journalism, medical, etc.) which contribute greatly to the image of the school.

It should also be noted that the school is a regional program that will involve five area states. This alone should help UMSL's prestige.

But it should at the same time be remembered the struggle UMSL had to make sure the school was started. After five years of work and several tense moments, the final approval came in.

It is a good sign that the UM Board of Curators and Missouri Legislature was as helpful as they were on this project. We will need these groups again if UMSL is to grow into the kind of institution that will best serve the St. Louis Community.

more letters

Dear Editor:

Now that the school year has begun, students are facing ever present problems with regard to registration, petition, and application. Mainly, the students at UMSL and other college campuses face the notorious bureaucracy and its painstaking red tape.

My intention is not to downgrade the university (the bureaucracy). To eradicate it's technicalities (red tape) would mean that the school would not exist as a bureaucracy. Therefore, if we didn't have bureaucracies we wouldn't be a so called civilized society.

I am modeling my suggestions after a university which shall remain nameless so as not to reveal my bias.

The first step to improve registration is to have the registration packet (now a one way ticket to insanity) located in the same place as registration where students can pick the packet up before entering registration.

The registration could even be made by appointment where I.D. numbers are actually checked or appointment cards could be given out on a heretofore announced date. The appointment card would admit the student to registration.

The next step would be to post canceled courses where everyone could see them by using an overhead projector. The closed sections can be marked through one of all the cards have been given out. Sound practical so far? Perhaps, but read on.

Each student at regular registration should be required to make a copy of his/her schedule. Now, this can be quite a hassle as I thought it was when I did it as a student. Consider the advantages to this requirement. If every student took two minutes to copy his/her schedule, then students would avoid incessant and needless calls inquiring of their schedules to the employees of the university. Money would be saved by not requiring use of computer printouts. The copied schedule may

be checked as a part of the packet. Perhaps, time, money and energy could be conserved by both students and employees.

More long lines could be avoided if fees were assessed by keypunchers and fees were allowed to be paid at a much later date. In addition, the 70% refund for the first three weeks of school is unfair because the student should be allowed 100% refund the first week of class to try the class out, at least. Some students have not even attended the first class and find that they cannot get a 100% refund.

Furthermore, students should be given instructions where and when to register if they are on summer vacation and registering for Fall semester. They could have the option of registering by mail. Also, the student should be given instructions to go straight to regular registration if he/she does not need advisement and is aware of prerequisite requirements. For example, if a student is carrying just one class and does not need to be advised on this, he/she should just go straight to registration.

The whole idea of obtaining Dean's signature and advisor's signatures disturbs me but forgive me I do not know why two signatures are required. Actually, some students forge these signatures because employees of the university can't tell one advisor's signature (or oft times secretary's signature) from another.

I hope that my suggestions for registration are helpful. The university in which I modeled by suggestions after also uses a card which the student carries around as a schedule, a receipt for textbooks, tuition, and appointments given.

Please consider improving registration. I feel registration should constantly be studied and improved. As a concluding thought, I feel registration is a concern to all of us whether faculty, staff or student. After all, we're all in this together.

Everly A. Lum

Dear Editor:

The campus has a record of rapid growth and buildings have sprung up at the rate of more than one a year since UMSL's founding in 1963.

A new kind of growth is underway. The UMSL Commons is developing into a beautifully landscaped, park-like section of the campus. The planners hope for many benches, tables and

trees to create a comfortable, relaxing environment for the entire campus to enjoy.

There are always some serious concerns about special areas like the Commons that cause planners to proceed with caution. These concerns include vandalism and more frequently, the prospect of litter, but the planners are optimistic about the

calibre of UMSL's community and have fought hard for picnic tables and other attractive features.

You will be an important factor in deciding to future development of the Commons. Please dispose of all trash in a receptacle and Help Keep It Special.

# SALT II

from page 2  
 negotiations."

General Richard Stilwell followed Colby, and gave the opposite perspective on SALT II. Stilwell is a member of the Coalition for Peace through strength, which is opposed to SALT II in its present language.

Stilwell asserted that the United States is in a far worse position than the Soviet Union under the terms of SALT II. He stated that the experience of the past ten years during which the U.S. has abided by various nuclear limitations treaties "does not square with the imperatives of national security."

"Ten years ago," stated Stilwell, "the U.S. military was part of the structure of international security glued together with nuclear weapons."

He said that this structure helped maintain the status quo in Northeast Asia and Western Europe from the Post WW II period up to ten years ago.

"Strategic Nuclear Weapons," said Stilwell, "have always been a force for peace as seen by the western world."

Stilwell stated that when the United States initiated SALT negotiations ten years ago, the U.S. was quantitatively and qualitatively ahead of the Soviet Union by a 2/3 ratio.

Stilwell said that the Joint Chiefs of Staff had reluctantly agreed to support SALT I during Nixon's Administration, with the condition that the U.S. would escalate their research and development of the Trident, Minutemen, and Cruise Missiles. During this period, however, Stilwell states that the Soviet Union has escalated its aggression all over the world.

"As of today, they've just about turned the tides quantitatively. We now find them equal to or ahead of us in all but two or three areas. This has brought us to peak levels of danger," Stilwell contended.

Stilwell said that while United

States citizens have seen the talks as a way to dampen aggressions, the Soviets has seen them as "another area of warfare in which to gain distinct military and political advantages, and a virtually unlimited scope for aggression."

Stilwell does not contend that there should be no SALT II, but that "we get the best deal for the United States."

He disclaimed Colby's statement about the acceptability of the U.S. not achieving all its objectives by saying "for the survival of our value system we need perfection," and that SALT II was, "equitable by no means."

In response to Colby's assertion that Soviet launchers would be limited by SALT II, Stilwell stated that launchers are not an accurate measure of equity because the Soviet Union's launchers are bigger than the U.S., and that theirs have more warheads than do ours.

Further, Stilwell said that launch-pads rather than missiles are limited under SALT II, and that the Soviet Union has specifically designed theirs for rapid reload.

"The protocol," said Stilwell, "is perhaps the most inequitable part of the treaty, because it prevents us from fielding long-range weapons in Europe." Under SALT II, said Stilwell, any United States weapon deployed in Europe and having a greater than 375 mile range will be counted as part of our nuclear arsenal, whereas Soviet missiles with a similar range will not be counted.

Among the amendments he suggested were elimination of the protocol so that the U.S. could immediately deploy the Cruise Missile, rather than having to wait the two-year period specified by SALT II and on-site inspection of Soviet weaponry.

His final statement was "it's later than we think."

## Bee Center provides research opportunities

Sarah Harris

While most university buildings have air-conditioners and various utility equipment on their roofs, Stadler Hall's roof is the home of UMSL's honeybees.

Nearly five years ago, Martin Sage, head of the biology department, and Jim Hunt, an assistant professor in the biology department, moved some beehives from Washington University's Tyson Research Center to an UMSL campus location.

The bees are of two varieties common to this area—the Italian and the gentle Caucasian. Their hives are constructed in a drawer-like frame for the bees to produce honeycombs which serve as nurseries and kitchens. Eggs are laid in some cells and others are used to store honey.

Although the bee center is thriving, it has been very inexpensive, "a shoestring operation," according to Sage.

"When Jim Hunt and I started the bee center," he said, "we used mostly our own equipment."

"We made our own hives and mostly acquired bees by finding wild swarms. We bought some queen bees, but that money came from our own pockets."

This year, the biology department has allocated \$300 for the bee project, but Sage said that "the cost of running it is negligible," and "we've spent at most thirty dollars in the last year."

Special equipment is needed for working with honeybees. Gloves and a veiled hat are necessities. A bee suit, a white cloth jumpsuit with a hat and veil attached, reduces the sting rate.

The bees themselves need little maintenance. "They are wild animals," said Sage. "They come and go. The only feeding we have to do is to make sure they have enough honey during the winter."

Although Sage began the bee center, and Hunt soon joined him, others are now using the bees for study. Grogan, Jon Averett, associate professor in biology, and Zulleya Halpin, assistant professor in biology, have begun research with the bees, and the five have formed the Bee Research Group.

"What is unique about the group is that each individual in the group has a certain expertise," Grogan said.

Hunt's area of study is social behavior. "My primary research interest is to try to understand the evolution of social behavior in wasps, bees, and ants," he said. His research, most of which deals with wasps, is underwritten by the National Science Foundation.

He began his study of the foraging behavior and the patterns of food-sharing four years ago.

"It will take the next five to ten years to answer questions on wasps," he said, "and then I will increase my research on bees."

Hunt sees his work as being important to more than just the field of biology.

"Social systems in non-human organisms lead to ideas in human social behavior," he said. "Although the connection may be obtuse, my research may make a real contribution to the understanding of human social behavior in the future."

Grogan became interested in the enzymology of the bee, while assisting Hunt in the laboratory. He is studying the activity of the two major enzymes found in the mid-gut of bees, which is similar to the human small intestine, during different times of the year. He has also made tests on the amino acids of the pollen on UMSL campus flowers.

"Little research has been done on the seasonal changes in the bee's enzymes, and this information could have agricultural implications," Grogan said. "The biggest problem is that the bee population has been devastated by pesticides, and some apiaries have been literally wiped out."

Grogan's three-year time-study will end in March, 1980.

The botany expert of the Bee Research Group is Averett, who is interested in the bee's role in plant reproduction.

Averett's research consists of studying agricultural crops, as well as domesticated flowers of this region. He tests pollen grains and nectars to see what carbohydrates and amino acids are present and checks their quantities.

"I already have information on major plants," he said. While he will probably end this particular research within four years, "this study of Missouri plants could go on indefinitely," he said.

Halpin's study involves observing bees while they are feeding to see what causes aggression.

Halpin described the aggressive behavior as "two bees actually grappling with each other and in extreme cases they are actually locked in contact or looking as if they are trying to sting each other."

This behavior has not been studied before, and Halpin predicts that it will take at least a year to complete this study.

In addition to the professional research, undergraduates use the bees, and the community is discovering the Bee Research Group to be a valued source of information.

Sage said, "Missouri Beekeepers were surveyed and indicated that they need an information center." The research group fulfills that need by answering questions over the phone, and by giving slide-show lectures.

This spring, courses will be offered by Extension Service. The beginning class will deal with the basic aspects of beekeeping and the advanced courses will contain more detailed information.

## Kickham, Gliders to play varsity team

### Rick Jackoway

Mark Kickham has been playing organized basketball for the last six years; he has participated in races of five and 10 miles. But some people still consider him handicapped.

Kickham thrives on competition. Despite the 20-game season and weekly three-hour practices, Kickham still feels the wheelchair basketball team does not work hard enough.

"Our team isn't as good as some of the others in the league (Midwest Conference Wheelchair Basketball League)," Kickham says. But, he quickly adds, they are good enough to beat the UMSL varsity men and women basketball teams in a wheelchair game next Wednesday.

"We might lighten up on them (the varsity) after we get too far ahead," Kickham says.

His team, the Gateway Gliders, will be playing the varsity teams Oct. 11 at 1pm on the outdoor basketball court behind Clark Hall.

The Gliders will play one half against each of the teams, spotting them 20 points per half. Then the gliders will play a game against volunteers from the audience.

The crowd is a big factor for Kickham. "We're hoping for a huge turnout," Kickham said, adding, "We don't usually get an audience at the VA Hospital (the home court for the St. Louis area teams), except maybe a few relatives."

The game is the second annual event. Last year the Rolling Rams, Kickham's former team, played the varsity men.

"I played with the Rams for four years," Kickham remembers "but I was the youngest on the team and didn't get much playing time after the first year."

The Rams is the oldest and according to Kickham, perennial best team in the league. The Gliders are different. Formed just a few years ago, the Gliders have a team of seven players and try to stay competitive. The [See "Kickham," page 8]

### Reynolds 'starts over' with new sophisticated, romantic image

Burt Reynolds is fighting for respectability. Since "Deliverance," in 1972, he has lost many a beefy role, thanks to a certain centerfold. At last, a film has come along that may change all that. And what better title for such a movie, than "Starting Over"?

In "Starting Over," Reynolds plays Phil Potter, a white-collar type who just divorced Candice Bergen. It is sort of the flip-side of "An Unmarried Woman," and this one has Jill Clayburgh too. Phil begins the process of starting over (get it?) as he buys a new apartment, attends an encounter group, and tries to establish some sort of love-life.

Which is where Clayburgh comes in. She is invited to the same dinner party as Reynolds, and thereby utters her rather memorable opening line, which is the sole reason for the film's "R" rating. What follows is the most blatant use of the "Boy Meets Girl" formula since "The Goodbye Girl." In both cases, it works.

Clayburgh is ingenuous, yet mature, in her portrayal, in contrast to Bergen's pseudo-sophisticated woman. Clayburgh is natural to the slightest mannerism, and is able to bring conviction to the hokiest lines of which there are few.

Bergen has a comparatively small role, yet she shows more real talent and acting skill than she has in any of her previous starring roles. The success of several scenes is due to her precise timing and inflection. Charles Durning (who seems to be in everything these days) is also very good as Phil's sympathetic brother. Mary Kay Place has a wonderful bit as Reynolds' date, in a caricature usually reserved for men.

At first glance, Alan J. Pakula, who showed effective directorial restraint in films like "Klute," "The Parallax View," and "All the President's Men," seems the wrong choice to direct a romance, especially after his disastrous "Comes A Horseman." But it is Pakula's control that keeps this film from slipping into mawkishness, and he knows how to adapt style to content, avoiding his familiar artiness. In this way he exhibits more versatility than, say, Herbert Ross, but one wonders if Pakula is

working beneath his talent.

Also on hand are a couple of really awful Marvin Hamlisch songs that were obviously included for album exploitation. They are so banal that it is a wise move to have Bergen sing them for laughs.

What it comes down to is a matter of taste. If you're just a romantic devil you will have no argument with "Starting Over." It is bright, interesting, never particularly perceptive, and frequently funny.

Burt Reynolds, who is at the center of the film, is better than you might think even is he doesn't play a character who drives a fast car and yells "yahoo" a lot. Reynolds as a romantic lead exhibits much of the charm of, if not a Cary Grant, at least a George Segal. For him, this could be the beginning of a whole new image.

Besides, he looks good in a three-piece suit.

## —Quick Cuts—

### Rocky II

Sure, "Rocky" was nice, but what's so special about watching the same clod do it all again, only with less charm, more cliches, and an unforgivably dumb "climax"? This is the last day of the film's long run, and if you haven't seen it yet—you're luckier than I.

### Monty Python's Life of Brian

The six-member troupe plays several dozen parts in their most solidly-structured work to date. It is a mildly disappointing treatment of a good idea. It follows "Brian of Nazareth," as he joins the People's Front of Judea (Or is it the Judean People's Front?), then is mistaken for a messiah and chased throughout Jerusalem by an inept Roman army. The film is funniest and saddest and makes its best point when it comments on religion and blind conformity, but is never particularly side-splitting.

### When A Stranger Calls

...take a message. The film has Charles Durning and Carol Kane, but it ain't "The Muppet Movie." If you believe a lot of horror films, babysitting

is the most dangerous thing a person can do. This version takes a few sharp plot turns that keep you interested, following rather erratically, a private eye's search for our old friend, the escaped mental patient. Effective photography, slow-pace, and a powerful musical score create a big buildup, but then director Fred Walton forgets what he was building up to. The result is about exciting as a dial-tone.

### National Lampoon's Animal House

Another chance to see John Belushi and company reek havoc on Faber College.

Simple, unrestrained bombardment makes this one of the most consistently funny comedies you'll ever see, assuming you don't mind frequent lapses of taste. Worth seeing twice, since audience laughter drowns out half of it.

### The In-Laws

Alan Arkin and Peter Falk get mixed up with a banana country dictator gone bananas. A farce which is never as funny as it tries to be but a lot funnier than it has any right to

be, the film's success is due to the stars' individual charismas.

### Time After Time

H.G. Wells (Malcolm McDonnell) builds that famous time machine, and Jack the Ripper (David Warner) uses it to escape into 1979, where he feels right at home, of course. The best moments come from Wells' fascination with modern San Francisco (a trip to McDonald's is a theme in itself). You can drive a trolley car through some of the plot-holes, and Nicholas Meyer's direction is at times a bit academic. But, these facts can be accepted within the context of the film, and the result is a funny, charming, fantasy-thriller with good performances all around, especially from Mary Steenburgen, who almost steals the show.

Cinema is a monthly review column which highlights films currently playing in the St. Louis area. Opinions expressed are those of the author, C. Jason Wells.

# COLLEGIALITY

Le Loup & Hutchison

## Kickham

from page 7

team is looking for handicapped people that would be interested in the league.

Outside of basketball, Kickham, an UMSL junior, takes a full load of classes, is interested in photography and goes on five and 10-mile races. "I went 20 miles once," Kickham recalls, "but I wouldn't do it again."

When Kickham and the Gliders take the court Wednesday, Kickham says they will not be out to prove anything — they just want to win.

But what they will prove is a motto of the league, "it is your ability not disability that counts."

In the Sept. 27 issue, the cast or the University Players' production "Hello, Dolly!" was incorrectly listed. Richard Green will play Horace, and Kathy Harris will play Irene Malloy. The Current regrets this error.

## UMMSL kickers battle SIU Cougars to 1-1 tie

Greg Kavouras

The soccer Rivermen are for real. At least they made believers out of Southern Illinois University-Edwardsville, whom they managed to tie 1-1 in a

tight contest Sunday.

SIU-Edwardsville came into St. Louis with a 6-2 record. They were riding high on a four game winning streak before UMMSL derailed their NCAA bound express.

Although the Rivermen did not win the game, they didn't lose either, and find themselves in some very select company.

Only two teams have managed to upend SIU-Edwardsville this season; 1978 NCAA Division II defending champion Seattle-Pacific, and 1978 NCAA Division I champion San Francisco.

SIU-Edwardsville is one of the few teams that UMMSL has had difficulty handling in the past.

The Rivermen are now 1-9-2 against their Illinois rivals since 1968.

The key to UMMSL's fine effort was the Dominic Barczewski - Don Ebert matchup. Ebert, SIU's star striker, has competed internationally and plays for the U.S. Olympic team. However, he was frustrated by the imposing 6-foot-2 Barczewski.

Ebert, an All-America candidate, took 10 shots on the afternoon, but Barczewski's effective containment, coupled with some brilliant goal tending by Ed Weis, forced most of the shots wide of the net.

Not only did Barczewski sparkle defensively, he also scored UMMSL's single goal at 62:20.

After taking a corner kick from Mike Bess, Jerry DeRousse tipped the ball to Barczewski, who had his back to the goal. He quickly turned around and

slashed the ball into the upper right hand corner of the Cougar net. It was Barczewski's first goal this season.

It looked as though the UMMSL score would win the game, but, alas, championship calibre teams like SIU do not give up easily.

With just 10:04 remaining in the game, Don Hundelt ricocheted a shot off UMMSL forward Tim Tettambel into the Rivermen net. The fluke goal ended the game in regulation at 1-1.

The tie helped UMMSL avenge last year's 7-0 loss to the Cougars - the worst defeat in Rivermen history.

Both teams blew several scoring opportunities as they battled through two 10-minute overtime periods. UMMSL has not scored

one goal in sixty minutes of overtime play this year, which accounts for their 3-1-3 record at the halfway point of the season.

The Rivermen battle Evansville University Saturday at 2pm. UMMSL students are admitted free.

## McKENDREE VS. UMMSL

The UMMSL soccer squad whitewashed McKendree College 4-0 last Tuesday to up its season record to 3-1-2.

See "Soccer," page 12

## Aquinas edges CBC in preliminary game

Jeff Kuchno

For those soccer enthusiasts who arrived at UMMSL's field at about 2pm last Sunday, it would have been wiser to come a bit earlier.

After all, the CBC Cadets and the Aquinas Falcons were engaged in a battle between two of the top high school soccer powers in the St. Louis area.

In a minor upset, Aquinas edged CBC by a score of 3-2.

The Falcons entered the contest rated fourth in the area with a 5-2-1 record, while CBC was rated second with a 7-1 mark, including a 4-1 victory over top-ranked Rosary.

The Cadets almost got on the scoreboard early when misfielder Mike Pieri's 25 yard free kick nailed the crossbar and ricocheted into the penalty area, but was cleared by an Aquinas defender.

Moments later, Aquinas capitalized on a scoring opportunity when Scott Huber drove the ball off the crossbar from about 20 yards out and into the left-hand corner of the net. Sophomore Tom Hayes assisted on the goal at 13:01.

Aquinas proceeded to control play throughout the first half, and utilized its blazing speed on the forward line to set up continuous scoring opportunities.

At 22:18, Hayes gave Aquinas a 2-0 lead when he took a pass from Dan King and broke in on Cadet Goalie Mike England, who had little chance to stop Hayes' low shot.

"Hayes is an excellent player," said CBC coach Terry Michler. "Our backfield play was loose and they took advantage of it."

Aquinas had another scoring chance late in the first half, but failed to capitalize. With four minutes remaining, Huber's corner kick was misplayed by England, and Aquinas' Pat Kellett shot the ball wide of an open net.

In the second half, it was CBC who controlled the play. The Cadets cut Aquinas' lead in half at 47:42 when CBC striker Jim McCormack settled a head ball from Jim Berberich and neatly tapped one by Aquinas' helpless goalie, Tim Genovese.

CBC scored the equalizer at 56:44 as Mike Menendez fed McCormack, who blasted a left-foot drive into the upper right-hand corner of the net to tie the score at 2-2.

CBC's comeback effort was a valiant one, but it wasn't enough as Aquinas' Hayes took command late in the contest.

At 62:05, Hayes crossed the ball to an uncontested Dan Schubert, who bombed a waist-high drive past a stunned England, and Aquinas held on for the victory.

"We have a very fast forward line and if we can get the ball to them, we can burn a lot of teams," explained Aquinas coach Vince Drake. "We just kick it up there and let them run."

CBC's Michler agreed. "CBC is a good team," he said. "They outthrustled us and deserved to win."

Drake cited the play of his midfielders, Tim Loughman, John Manion, and Scott Hennessy as a key to victory. "They played well," he said, "and so did our backs, Dale Kluba and Dan King."

## Harriers experience the unusual

Gary Esayian

The UMMSL Cross Country team experienced a rather unusual week of competition, that was highlighted by Jerry O'Brien's outstanding performance in the first annual St. Louis University Invitational Meet.

The very fact that the harriers competed in the St. Louis meet rather than the scheduled Missouri Intercollegiate Meet in Columbia was the source of the week's first oddity.

As coach Frank Neal explained, "The Missouri Intercollegiate has become totally dominated by Mizzou. They set the time and conditions under which the meet is run, without any input from the other schools involved. In answer to this situation, the St. Louis U. Invitational was created."

The Rivermen, running without the services of steady performers Andy Knapp, Mark

Young, and Joe Halley, finished last in the six team five mile Forest Park run won by Central Missouri State.

Out of forty-two runners, O'Brien finished 25th with a time of 27:18. He was followed by Don Schwalje at 28:06 (29), Steve Walters at 28:32 (31), and Sam Farinella at 30:43 (34). The Rivermen's Larry Worrell was forced to withdraw during the course of the race due to a leg cramp.

The week's second oddity occurred on Saturday, as the Rivermen traveled to Edwardsville to compete in the SIU Invitational. A meet originally scheduled for eight teams found five of those eight teams cancelling prior to the Saturday morning start.

"The only three teams left were Indiana State-Evansville, SIU-Edwardsville, and ourselves, but we ran just the same," said Neal.

The Rivermen, again without the services of Knapp, Young

and Halley, finished third in the five mile event. O'Brien led the squad with a ninth place finish while Steve Walters followed in the tenth spot.

UMMSL's Teresa Ostrowski, who was scheduled to run in the women's division, got a chance to run with the men as the women's division was scratched due to the loss of competing teams. She finished a respectable fifteenth in the all male field of twenty-one.

This Saturday will find the harriers in Rolla competing in a series of dual matches. Coach Neal believes that with the return of the three runners missing from last week's action, in addition to a sound week of running practice, the squad rates a good chance of winning three matches out of four.

Barring any unusual occurrences, UMMSL's team-oriented Cross Country squad should perform well.

# UMSL kickers bound for Miami

As the UMSL Rivermen soccer squad began preparations for the 1979 season, Coach Don Dallas and his cohorts felt that this team could be one of UMSL's best in recent years.

With five returning starters and a host of highly-touted Junior College transfers, such optimism seemed appropriate. The Rivermen were ready to open the season with a bang.

However, UMSL's early season performance was anything but auspicious. After losing to the Alumni and then St. Louis University on opening night by identical scores of 3-0, folks around here began wondering if this was the same team Dallas spoke so highly of prior to the season.

Well, perhaps it was just a matter of time, but the Rivermen seem to have turned things around. Since the St. Louis U. debacle, UMSL has gone undefeated, winning three and tying three. In that six-game span, they outscored their opponents 12-3.

With a record of 3-1-3 and seven games remaining, UMSL seems bound and determined to reach the NCAA division II soccer playoffs to be held in November. Barring a total collapse, they should make it with ease.

There are several factors that have figured in UMSL's turn-around. One is the switch of Tim Pendergast from midfield to defense. Pendergast, a Junior-College transfer from Florissant Valley, seemed disoriented at midfield, but since being moved to the backline, has been extremely tough. His performance against SIU Edwardsville (a 1-1 tie) on Sunday was outstanding.

Another transfer from Flo Valley, Dan Muesenfechter, has been a major reason for UMSL's success. Against St. Louis U., Muesenfechter's offensive ability was almost non-existent. But since then, he has emerged as the team's most prolific scorer with 2 goals and 5 assists.

Larry Schmidgall is yet another transfer from Flo Valley who has been perhaps UMSL's most consistent performer thus far. He has 3 goals and 1 assist, and along with Jerry DeRousse, has solidified the midfield position for UMSL.

DeRousse, who was bothered by a pulled leg muscle early in the season, has come on strong of late. A starter in 1977, DeRousse missed all of last season with a broken leg, but now it seems he has made a full recovery.

The play of Pendergast, Muesenfechter, Schmidgall, and DeRousse is only one reason for UMSL's success. Another reason has been the effort of the defense.

Dominic Barczewski, Pendergast, Randy Ragsdale, Mike Bell, and Bill Colletta have been

almost impenetrable on the backline and Ed Weis has blossomed into a top-notch goalkeeper.

Weis, a 6-foot-3 freshman from Roosevelt High School in St. Louis, was severely tested in Sunday's game against SIU, and was equal to the challenge.

## KUCHNO'S KORNER

Weis made the play of the game only three minutes into the second half, when he made a diving save on a breakaway shot by SIU's Dave Hummert.

There is no doubt that UMSL is an improved team. Even now, the opening game loss to St. Louis U. doesn't seem so bad, since the Billikens have run up a 9-0 record and are ranked second in the nation.

Perhaps the best example of UMSL's improvement, though, is its performance last Sunday against SIU.

The Rivermen were out to avenge last year's 7-0 loss to the Cougars, the worst in UMSL's history. With most of SIU's squad returning intact from last year, the task seemed a difficult one.

To make matters worse, UMSL played without the services of defender Bill Colletta, a three-year starter, who was out with a leg infection.

In addition, Tim Tettambel, another three-year starter, was bothered by a sore ankle that has caused him to see limited action.

However, the Rivermen battled the Cougars tooth and nail. For most of the 110 minutes played; 90 minutes regulation and 20 overtime, UMSL dominated. It seems amazing that a team can play the majority of a game without two three-year starters and still outplay a team like SIU. But UMSL did.

In fact, UMSL's performance was so impressive that Colletta and Tettambel may find difficulty getting back into the starting line-up.

UMSL seems destined for post-season action, but the ultimate goal is to make it to the final four at the national tournament to be held in December, in Miami, Florida.

Of course, it may be too early to make reservations for Florida, but the way the UMSL kickers are playing, a trip to the sunshine state is right around the corner.

# Field Hockey falters; eyes improvement

Terri Moore

UMSL's field hockey team suffered two consecutive setbacks last week at the hands of Southeast Missouri State and Western Illinois.

"We played terrible. I don't know what was wrong," said coach Ken Hudson, "we didn't play like we had been playing."

"I was disappointed in the way they played this week," he added. "We're going to make some changes to shake them up and get some more offense. We've only scored something like five goals in seven games."

On Tuesday, the women scored only one goal in losing to Southeast 2-1. The goal was scored by Patti Crowe on an assist from Florence Luna.

UMSL outshot SEMO 20-6 but as coach Hudson commented they really didn't play together as a team, they didn't take advantage of their opportunities.

The team traveled to Macomb, Illinois on Friday to take on Western Illinois and finished with a 4-0 loss.

The score could have been 1-0 according to Hudson. "Western Illinois scored three of its goals on plays that could have been penalties," he said. "The officiating was questionable, but I hate to harp on that because we aren't playing as well as we were at the beginning of the year."

"We really played kind of bad, but I don't think Western Illinois has lost a home game," he added.

It was a tough week for the women with the two losses leaving its season record at 2-5.

UMSL will play SIU Edwardsville at Edwardsville on Tuesday and will return home to face SEMO on Saturday at 1:00 and St. Louis University on Sunday.

Says coach Hudson, "The game against Southeast will be a good game because we will be looking for revenge. It would also be nice to beat St. Louis U. because they have such a good team."

and Tim Loughman, looked impressive.

Judging by Sunday's game at UMSL, CBC and Aquinas will probably cross paths later in the season, at the November state tournament.

# Barczewski shows Cougars he can play offense, too

Jeff Kuchno

It was a happy UMSL locker room moments after UMSL's impressive 1-1 tie against the awesome SIU-Edwardsville Cougars last Sunday at UMSL, and among the happiest of Rivermen was centerback Dominic Barczewski.

It was Barczewski who was placed in the unenviable position of marking SIU's Don Ebert, perhaps the best forward in college soccer.

Barczewski did an outstanding job, though, of marking Ebert as he covered SIU's top scoring threat like a blanket. He followed the Cougar Striker step for

step all over the field, and turned the bright, sunny afternoon into a frustrating one for Ebert.

Even though Barczewski played a steady game throughout the contest, his real moment of glory came midway through the second half.

At 62:20, UMSL's Mike Bess directed a corner-kick towards the penalty area where Jerry DeRousse headed the ball to Barczewski, who had his back to the goal. Barczewski turned and rifled a shot into the upper right-hand corner of the net behind SIU goalie Ed Gettemeier, to give UMSL a temporary 1-0 lead.

At the time of the goal, the UMSL players became ecstatic and seemed to be in a state of euphoria, thanks to Barczewski's blast.

SIU knew about Barczewski's defensive ability. But it was Barczewski's offensive prowess that was the focus of conversation after the game.

"I never score," insisted Barczewski. But the 6-foot-2 centerback did score, and he couldn't have picked a better time to do so.

"DeRousse deflected the ball right to me," explained Barczewski. "I just turned and shot."

Barczewski doesn't normally get involved in the offensive play, but on corner kicks, he becomes a definite scoring threat because of his height.

Barczewski's goal was his first of the season. He scored two goals last year under similar circumstances.

"On corner kicks, I come up and try to head the ball in or set up someone else," explained Barczewski. "I was lucky to get the opportunity to score."

DeRousse explained his part in the goal. "I knew somebody was in the middle," he said. "All I did was deflect it off my forehead to Dom."

DeRousse, who played an outstanding game at midfield, felt UMSL outplayed the Cougars. "We got the goal we wanted," he said, "but then we gave up a cheap one."

It was Barczewski, though, who stood in the limelight for UMSL. Although he played an exceptional game, he opted to talk about his teammates' performance.

"The only way you can beat or tie these kinds of teams is to give an eleven-man effort," he said. "Against SIU, you have to play man-to-man, and mark them closely."

"It was a total team effort. If someone got behind me, Randy Ragsdale or someone else would pick him up."

Barczewski also spoke highly of SIU's Ebert. "He's probably one of the best forwards in the country," he said. "He never gives up."

Barczewski doesn't give up, either. He battled Ebert for 110 minutes in a grueling match, and in the end, deserved all the accolades thrown his way.

"Our backfield played fabulous," said UMSL coach Don Dallas. "Dominic was up against the best forward in college ball today and was equal to the task."

With a record of 3-1-3 and seven games remaining in the regular season, it appears the Rivermen are destined for the NCAA playoffs, and Barczewski concedes that they are within reach of that goal.

"I would say all we have to do is beat the teams we should, and the teams in our region," he said. "We'll just have to take them one at a time."

If UMSL is to reach the playoffs, a lot of its success will hinge on the defensive ability of Barczewski. And his offensive ability, too.

DOM HITS A BOMB: UMSL's Dominic Barczewski blasts one by SIU defender Tim Guelker [14] and into the goal for umsl's only score of the game[phot by Paul Killian].

## A career in law— without law school.

After just three months of study at The Institute for Paralegal Training in exciting Philadelphia, you can have a stimulating and rewarding career in law or business — without law school.

As a lawyer's assistant you will be performing many of the duties traditionally handled only by attorneys. And at The Institute for Paralegal Training, you can pick one of seven different areas of law to study. Upon completion of your training, The Institute's unique Placement Service will find you a responsible and challenging job in a law firm, bank or corporation in the city of your choice.

The Institute for Paralegal Training is the nation's first and most respected school for paralegal training. Since 1970, we've placed over 2,500 graduates in over 85 cities nationwide.

If you're a senior of high academic standing and looking for an above average career, contact your Placement Office for an interview with our representative.

## Volleyball hosts tourney

eleven colleges and universities, including one claiming to have perhaps the best player in the midwest, will join the University of Missouri-St. Louis for the fourth UMSL Invitational women's volleyball tournament, Oct. 5-6 at UMSL.

"The University of Dayton is clearly the team to beat," said UMSL coach Gary Custer. "(Dayton's) Ann Meyer is one of the best players I've seen and they have a great team to go with her."

The Flyers are led by Meyer, who recently scored on 17 kills in a win over Louisville. Dayton is the tourney's defending champion. Last year, the Flyers put together a 56-6 record — good for fifth place nationally among small colleges.

Other schools in the two-day tourney are: St. Louis University, William Woods College (Fulton, Mo), florissant Valley Community College, Eastern Illinois University (Charleston, Ill), Benedictine college (Atchison, Ks), Central Missouri State University (Warrensburg Mo), Illinois State University (Normal, Ill), Iowa state University (Ames, IA)

"In addition to Dayton," Custer says, "I'd have to list Eastern Illinois and Central Missouri as favorites. They're fine teams."

Custer wasn't about to cut out his own squad. "We're improving every match," Custer said of his squad which has won six of its first 10 contests. "One of our losses earlier this year was to

# Former All-American Williams named new UMSL assistant

Terril K. Williams, 24, of St. Louis, has been named assistant wrestling coach at the University of Missouri-St. Louis.

Williams is a 1973 graduate of Webster Groves high school, where he was a member of the Missouri all-star freestyle wrestling team and finished second in the 1973 state wrestling meet.

Williams wrestled at Forest Park Community College where he continued to pile up the honors. In 1975, he placed seventh in the national junior college meet. That year he also defeated the Korean national champion in international competition and placed first in the

national judo championships. He holds the Forest Park record for most consecutive wins (20).

Williams entered the University of Missouri-Columbia in the fall of 1975. He finished third in the Big Eight Conference both his junior and senior years. As a

senior, he placed fourth in the NCAA national meet and recorded the fastest pin of the tournament. Williams' performance earned him All-America honors--the first such recognition for a

Missouri wrestler. He served as an assistant for Missouri the past two seasons.

Recently, Williams received his black belt in karate. He teaches a self-defense class in the UMSL sports instruction program.

"Terril is not only an outstanding wrestler," says UMSL first-year head coach Tom Loughrey, "he also is one of the finest young men I've ever known. His presence on the staff will be a major factor in helping us establish a quality program in a short period of time. Our relatively young team will benefit greatly by working with him daily in practice. I am very happy to have such a capable and enthusiastic person in this position."

## Soccer

The Rivermen had a bone to pick with the Lebanon, Illinois school. McKendree won the first UMSL Soccer Classic four weeks ago on UMSL's home turf, and the high-powered Rivermen were intent on seeking revenge.

UMSL was paced by Larry Schmidgall and Dan Muesenfechter, a pair at Florissant Valley recruits who have led the Rivermen offensive firepower this season.

Schmidgall did not waste any time putting UMSL on top as he crossed up Bearcat defenders with a goal at 6:26. Muesenfechter was credited with the assist.

from page 9

The UMSL backfield kept McKendree in check all evening. Although the Bearcats laced 13 shots toward the Rivermen net, goalkeeper Ed Weis made only two saves as he registered his second shutout of the year.

The visiting Rivermen led at halftime 1-0.

Schmidgall gave his squad a two goal bulge at 59:11. After taking the assist from Joe Geerling, Schmidgall rifled a shot beyond the outstretched McKendree goalie.

At that point the Rivermen were in full command. Geerling took matters into his own hands at 65:16 as he scored his first goal of the season, giving UMSL

a 3-0 advantage. He was assisted by Muesenfechter.

Forward Mike Bess gave UMSL its 4-0 margin of victory as he tallied a goal at 81:08. Muesenfechter picked up the assist, giving him seven offensive points (2 goals and 5 assists) through six games.

## Volleyball

from page 11

Iowa State at Warrensburg. We'll face them in the tournament and we're looking forward to the chance to get back at them. We played them very close before and they're a strong team."

"I think we'll be displaying some of the very best volleyball talent in the midwest. I believe people who come out to see the games will be surprised at the outstanding calibre of play. It should be a great weekend."

Three matches will be played simultaneously in the opening rounds in the spacious Mark Twain Sports Building on the UMSL campus. Friday's games begin at 5:15pm and Saturday's games start at 12pm.
